

ABSTRACT

A gutter system for preventing leaves and other debris from obstructing a gutter is provided, the gutter system including a bracket and a gutter cover. The bracket is
5 removably coupled to a hanger and removably secured to the gutter cover.

Cover the following in claims for Non-provisional application:

- 1. idea of locking top of bracket;**
- 2. providing a secure seal;**
- 3. having a positive attachment, i.e., no screws required;**
- 4. male/female connection of bracket and gutter cover;**
- 5. facilitating installation, i.e., always positions gutter cover properly with respect to front of gutter and fascia board;**
- 6. integrating gutter, brackets, gutter covers (including side-by-side gutter covers) and end caps; and**
- 7. mating relationship between bracket and gutter cover is important feature.**
